

Lean Construction Market Penetration Benchmarking Initiative — quick reference for Country Leads. Germany 2025 (KIT & GLCI) is the reference model. Core metrics stay locked so national results remain comparable.

Status ladder

Existed → Joined → Studied → Published

Existed: on the directory. Joined: Country Lead registered. Studied: survey complete. Published: headline results on the dashboard.

Five maturity stages (locked)

- | | |
|---------------------------------|---|
| 1 Informed | Aware / capable, but no concrete Lean measures in practice yet. |
| 2 Piloting | Initial Lean practices in a few construction projects. |
| 3 Selective standard | Standard in some projects, not yet company-wide. |
| 4 Majority of projects | Standard application in the majority of projects. |
| 5 Culture & strategy | Lean embedded in strategy, structure, and culture. |

Source: adapted from the German 2025 survey orientation text (John et al., KIT & GLCI).

Other locked core metrics

- Share of projects using Lean — e.g. <10%, 10–25%, 25–50%, >50%, all
- Project phases — planning, execution, or both
- Company profile basics — size, role in the supply chain, years applying Lean

4L4D frame (German synthesis model)

The 4L4D frame is the synthesis model from the German 2025 study: four levels and four dimensions of Lean Construction application. Use it as a shared lens when interpreting maturity and practice patterns. Full definitions live in the Germany 2025 research report; keep national wording close to that source so cross-country comparison stays meaningful.

4 Levels (example lens)

- Organisation / strategy
- Project delivery
- Process / methods
- People / culture

4 Dimensions (example lens)

- Depth of application
- Breadth across projects
- Capability & learning
- Outcomes & impact

Treat the boxes above as a Country Lead shorthand. Prefer the published German report wording when you write nationally.

Three phases (German model)

1 Industry scan → 2 Practitioner interviews → 3 Nationwide survey

Germany 2025 reference: 451 Lean companies mapped · 15 interviews · 97 survey responses (22%).
